

Machinery Risk Assessment (CE03)

Risk assessments need to be carried out when machines are designed, manufactured, put into service or modified. This course is intended to explain the role of standards in the risk assessment process, and will use practical examples to help delegates carry out the risk assessments on their own products.

Topics covered:

- Identifying and applying standards
- Responsibilities
- The Machinery Directive EHSRs
- Practical examples

Who should attend?

Anyone involved in specifying machinery or who is responsible for the safety of end users: design engineers, project managers, importers, and health and safety professionals. Attendees are expected to have a basic understanding of what CE or UKCA marking is before they attend. Please see our Introduction course as a prerequisite.

Cost: £299 + VAT per person for a single half day course.

Book online at <https://shop.conformance.co.uk> or by phone on +44 (0)1298 873800.
